

## **SETRANGE:**

SETRANGE is string command which is used to overwrite the substring at a given key starting at the specific offset.

## **SYNTAX:**

SETRANGE KEY OFFSET VALUE

## **EXAMPLE:**

```
D:\Redis\redis-cli.exe
127.0.0.1:6379> SET Name "This is Ajay"
OK
127.0.0.1:6379> SETRANGE Name 8 "Maayon"
(integer) 14
127.0.0.1:6379> GET Name
"This is Maayon"
127.0.0.1:6379>
```
